WELCOME TO

AUSTRALIAN WILDLIFE PARKS

Australian Wildlife Parks proudly cares for the largest collection of Australian native wildlife in the world, and an incredibly diverse variety of exotic species at Featherdale Sydney Wildlife Park, Mogo Wildlife Park on the NSW South Coast, and Hunter Valley Wildlife Park.

All three wildlife parks play an important role in the continued conservation of many of the world's endangered species, and to foster knowledge and respect for the world's wildlife.

By choosing an Australian Wildlife Parks' venue for your next group event, we will not only offer your guests an unforgettable experience, but you will also support our mission to teach your guests more about our animals.

We invite you to chat to our Australian Wildlife Parks Events Team today – please call **02 9622 1644** or email us a description of your event to events@austwp.com.au

We invite you to create your event with us.
